Subject: Petroglyph's 19-11 Injector Workover
Ute Tribal 19-11 LMI #2 Letter.docx

::

Good Morning Gary,

I just wanted to take a moment and notify you of our plans to re-perforate our Ute Tribal 19-11, before restoring mechanical integrity. Please see the attached workover plan. We will be re-perforating the current perfs and adding new perfs below the current perfs. All perforations will be made within the permitted interval and the new perforations will not be any shallower than the current highest perf. We plan to rig up next week. Give me a call if you have any questions. You'll also be receiving a signed version of the attached plan.

Thanks,

Rodrigo Jurado
